

Keep your historical records. Let go of what's slowing you down.

Switching software doesn't have to mean starting from scratch. With PowerIA and PowerAction, you can preserve your internal affairs cases and use of force reports, and rebuild your agency's structure with the flexibility and control you wish you had before.

What You Keep

Your History

- IA cases, attachments, outcomes, and metadata
- Use of force reports from previous systems
- Analytics across legacy and new records

What You Configure

Your Ideal Structure

- Divisions, reporting groups, personnel hierarchy
- Role-based access controls tailored to your chain of command
- Clean configuration without carrying over outdated workflows

How It Works

1. **Export** your data to our template
2. **Upload** CSV + PDFs into PowerIA or PowerAction
3. **Validate** and review
4. **Records are in PowerIA and PowerAction—seamlessly**

“Once we got to the point of training our staff on it, they got through it and asked, ‘What else do we have to do?’ They couldn’t believe that was it.”

Lieutenant Todd Elliott
Battle Creek Police Department, MI
